Education

B.Tech in Computer Science and Engineering

Sikkim Manipal Institute of Technology

2021 – 2025

CGPA: 7.5 / 10

Class XII (CBSE)

BNS DAV Public School, Giridih, Jharkhand

2021

94%

Professional Experience

Associate Software Developer

Oct 2025 – Present

TPEX Solutions Pvt. Ltd.

Built healthcare applications using **Flutter**, **Node.js**, and **MongoDB**, supporting teleconsultation workflows.

Implemented backend services using **JWT**, Redis caching, and query optimization, improving reliability and performance.

Engineered booking workflows, **Razorpay** integration, and reminders to support secure transactions and automation.

Built a cross-platform matrimonial app using **Flutter** and **Firebase**, supporting profile discovery efficiently.

Expanded filtering logic for caste, gotra, manglik status, and partner preferences, improving match discovery significantly.

Constructed real-time chat and connection workflows using Firestore listeners and **Cloud Functions** securely.

Software Engineering Intern

May 2025 – July 2025

Optare Design Systems Pvt. Ltd.

Constructed and released a scalable B2B mobile app using **Flutter** and **Firebase**, successfully adopted by clients.

Established and deployed the responsive company website, significantly enhancing online presence and client engagement.

Automated log collection and proactive server monitoring with Bash scripts, effectively reducing manual effort by 40%.

AI & Backend Intern

Jan 2025 – May 2025

Center for Railway Information Systems (CRIS)

Engineered and deployed an intelligent **Rasa** chatbot integrated with production databases at scale efficiently.

Streamlined complex **MySQL** queries and indexing strategies, significantly reducing response time by 30% consistently.

Worked with real-time data pipelines, ensuring high availability and reliability across distributed systems globally.

Enhanced system performance and scalability through backend query optimization and architecture refinement.

Projects

CRM Application

React.js, **Node.js**, **MongoDB**, **Redux**, **JWT**, **REST APIs** Code

Generated a **React**-based CRM system with authentication, lead tracking, and role-specific admin dashboard features.

Secured the **Node.js** backend using **MongoDB**, **JWT** authentication, and **REST APIs** for robust data flow.

Fine-tuned user experience with Ant Design, Redux state management, and efficient protected routing systems.

MindOne - Document Collaboration Platform

Next.js, **Node.js**, **Express**, **MongoDB**, **Mongoose** Code

Created a real-time collaboration platform with **Next.js**, **Node.js**, and **MongoDB**, supporting document editing.

Utilized version control, @mention notifications, and secure role-based access using **JWT** authentication tokens.

Streamlined performance with Tailwind CSS, ensuring seamless usability across desktop and mobile devices.

MilkTrack - Dairy Farm Management Application

Flutter, **Dart**, **Firebase**, **Cloud Firestore** Code

Developed a cross-platform dairy farm management application to digitize milk production, sales, expenses, and records.

Applied authentication, real-time synchronization, and role-based access using **Firebase Authentication**.

Initiated intuitive dashboards, session-based milk tracking, report generation, and transaction management with **Flutter**.

MovieTicket - Online Booking Platform

React.js, **React Router**, **Context API**, **Tailwind CSS**, **Netlify** Code

Enhanced a movie ticket booking system with **React.js** and Tailwind CSS for responsive UI layouts.

Employed interactive seat selection, secure authentication, and integrated payment processing for smooth transactions.

Structured modular architecture with reusable components and managed state using the **React Context API**.

Heart Disease Prediction System

Python, **scikit-learn**, **Seaborn**, **Streamlit**, **ZenML** Code

Planned a machine learning system with Random Forest, SVM, and Logistic Regression, achieving 85%+ accuracy.

Built an **MLOps** pipeline covering preprocessing, training, evaluation, and deployment for continuous model improvement.

Released a **FastAPI** web application enabling doctors to assess patient risks instantly with structured input data.

Technical Skills

Programming Languages: **Python**, JavaScript, C++, C, SQL, Dart

Cloud Platforms: **AWS** (EC2, S3, IAM, CloudWatch)

DevOps & CI/CD: GitHub Actions, **CI/CD Pipelines**, **Docker** (Basic)

Infrastructure & OS: Linux CLI, Server Configuration, Environment Management

Backend & APIs: **Node.js**, Express.js, **FastAPI**, **RESTful Services**

Databases: **MySQL**, PL/SQL, **MongoDB**, **Firebase**

Monitoring & Security: Logging, Error Tracking, Access Control, **JWT**, **OTP**
Version Control & Tools: Git, GitHub, VS Code, Cursor, Postman, Figma, LaTeX, Jira, MongoDB Compass

Certifications

The Complete Full-Stack Web Development Bootcamp, Udemy (Link)	Sep 2024
Accenture Data Analytics and Visualization Job Simulation (Forage)	Jul 2024
Python (Advanced), HackerRank	Sep 2023
SQL (Advanced), HackerRank	May 2023
Summer Training in AI, IIIT Allahabad	Jun–Jul 2023

Achievements

Solved 350+ problems in Data Structures and Algorithms on LeetCode.
